Introduction

In 2000, Dan Nicolson decided that it would be worthwhile to complete the supplements to TL-2 that were planned to treat authors from A to G. (The first volume of TL-2 was published without the financial support that became available for the remaining six volumes treating authors from H to Z and it was long recognized that the entire work would be better balanced by providing supplemental information on the authors treated in the first volume.) Supplements one through six (authors A to E) were published from 1992 to 2000, the last two posthumously. Sadly, in a relatively short period of time the principals in the original project (Frans Stafleu and Richard A. Cowan) and supplements (Frans Stafleu and Erik A. Mennega) all died. Richard A. Cowan, who had moved to Australia and was not involved in preparing the supplements, died on 17 November 1997, and then Frans Stafleu, who had conceived of and directed this enormous project, died on 16 December 1997. Finally, Erik A. Mennega, who co-authored six of the supplements with Stafleu, died on 27 January 1998. Norbert Kilian and Ralf Hand assumed responsibility for bringing manuscripts for supplements five and six to completion.

Since no manuscript for the supplement(s) treating authors F and G existed, the first challenge for Nicolson was to create an outline from the materials deposited in the Taxonomic Literature Data File (i.e. ca. 1.2 million data sheets underpinning TL-2 and now archived in the LuEsther T. Mertz Library of the New York Botanical Garden). In the course of working with these files, some materials prepared by Mennega were discovered and incorporated into the supplement(s). Simultaneously, biographical and bibliographical materials for authors who had already been treated in TL-2 but who were being treated in greater detail were transferred from the published volumes to the growing manuscript(s). Also, as opportunity presented itself, Nicolson began examining reprint collections at the botanical libraries he was able to visit in order to either confirm or add titles.

Laurence J. Dorr, reluctant at first to assume more than a subordinate role, became more deeply involved in the project after the Vienna Congress in 2005. With a manuscript that treated more than 600 authors and their works, he searched electronically a core set of library catalogs (i.e. Bibliothèque nationale (Paris), BM, FH, HH, K, LC, MO, NY, NYPL, US) and union catalogs (OCLC, RLG) for additional works by each of these authors. This generated hundreds of potential new entries for titles that had not been identified in the archive created by Stafleu et al. These new (and older) entries were then verified by either Dorr or Nicolson. The Smithsonian Institution Libraries and other libraries in or near Washington, D.C. frequently were consulted (Dorr verifying items at the Library of Congress and Nicolson at the U.S.D.A.) and numerous trips were made to the Bronx and Cambridge to use the very rich libraries of the New York Botanical Garden and Harvard University. When the project was near to comple-

tion Dorr visited London to verify items at Kew and the Natural History Museum (London) that could not be located in the U.S.A. In addition to expanding the list of titles, Dorr also researched and revised all of the biographical entries for the authors treated.

Notice to the Reader

The information in this Supplement is organized and presented exactly as in the main volumes of TL-2, and as explained in the Introduction to Volume 1. For quick visual orientation, the reader may also refer to the annotated "blueprint" sample pages that appear on the end papers of Volumes 1-7, and which are not again reproduced here. A cumulative list of abbreviations used throughout TL-2 can be found in Volume 7 (p. xxv-lvi) with additions for the final two Supplements in Supplement 7 (p. xi-xvii).

An asterisk (*) denotes names of authors already treated in Volume 1 of TL-2. For such authors, information under the headings "Herbarium and Types," "Bibliography and Biography," as well as in the "Biofile" (see TL-2, Vol. 4: vii) is complete, while other data are complementary to those in the main volume.

This Supplement was compiled simultaneously with Supplement 7. Thus our explanations with respect to methodology and acknowledgments for assistance are the same. As before, we wish to note that the indices to names and titles in this Supplement were organized by L.J. Dorr and reviewed by Rose Gulledge. Jamie S. Whitacre numbered the titles in the text and populated the indices with these title numbers. Franz Stadler was production editor of this volume, formatting the text for publication. He also proof read both Supplement 7 and 8, and his critical eye has made both volumes substantially more accurate.

Funds for this project were provided by the Atherton Seidell Endowment Fund of the Smithsonian Institution for which we are grateful.

Frickhinger family. Prof. Karl Mägdefrau kindly provided F.A. Stafleu (in litt., 15 Sep 1979) data on this Bavarian family that may help others sort out its four generations of botanists (and naturalists):

1st generation: (1) Christian **Albert** (Adalbert) **Frickhinger** (pharmacist, b. 16 Jan 1818 in Nördlingen, d. 20 Mar 1907 in Nördlingen). – In 1848, published on vegetation with Adalbert Schnizlein (A. Frickhinger's brother-in-law), see TL-2/5, nr. 10.967.

2nd generation: (1) **Hermann Adalbert** (Albert) **Frickhinger*** (pharmacist, b. 8 Jan 1851 in Nördlingen, d. 4 Mai 1940 in Nördlingen, see TL-2/1: 878). – Published on vascular plants 1905-1926, incl. *Gefässkrypt. & Phanerogamenfl. Ries. ...* 1911, see TL-2/1, nr. 1861. (2) **Karl Frickhinger** (medical doctor, president of Munich Red Cross, b. 3 Mai 1863).

3rd generation: (1) **Ernst Christoph Frickhinger** (botanist, b. 3 Oct 1876 in Nördlingen, d. 10 Oct 1940 in Nördlingen), son of H.A. Frickhinger. – Thesis on plants of the Rieses 1904, 1922, 1926. (2) **Hans Walter Frickhinger**, son of Karl Frickhinger (wrote on nature, incl. plant diseases, b. 18 Sep 1889 in Nördlingen, d. 25 Jan 1955 in Geisenhausen?).

4th generation: (1) **Karl Albert Frickhinger** (pharmacist and paleontologist who published on fossil fishes, b. 1924, d. 28 Mai 2003, see *Archaeopteryx: Jahreszeitschrift der Freunde des Jura-Museums Eichstätt* 21: 69. 2003).

Frickhinger, Ernst Christoph (1876-1940), German botanist and pharmacist, born 3 Oct 1876 in Nördlingen, doctorate 1904 Erlangen, died 10 Oct 1940 in Nördlingen. (*E. Frickh.*).

Fries family. As there is much confusion about this Swedish family that produced so many well known botanists, we thought it wise to incorporate here a small chapter on their “botanical” genealogy. This is useful as several members of this family received the same given names and often published using only part of their names. A more complete genealogy can be found at Elias Fries Ättlingar (an electronic resource).

1st generation: The first and best known botanist in the Fries family was **Elias Magnus Fries** (1794-1878) (better known as Elias Fries). Elias Fries had eight children among which three sons continued his interest in botany, viz. (1) **Theodor** [Thore] **M[agnus]. Fries** (1832-1913); (2) **Elias Petrus Fries** (1834-1858); and (3) **Oscar** [Oskar] **Robert Fries** (1840-1908) (a.k.a. Robert Fries, which often causes confusion with Robert E. Fries of the next generation).

2nd generation: The eldest son of Elias Fries, Theodor M. Fries (1832-1913), also had three sons interested in botany, viz. (1) **Klas Robert Elias Fries** (1876-1966) (better known as Robert E. Fries); (2) **Thoralf Gustaf Elias Fries** (1882-1963) (better known as Thoralf Fries, and almost unknown to botany); and (3) **Thore Christian Elias Fries** (1886-1930) (a.k.a. Thore Fries). The wife of Thore Fries, **Fennia Maria Fries** (née Rosberg) (1897-1987), painted and collected plants.

The second son of Elias Fries, Elias Petrus Fries (1834-1858), died at only 24 years of age without issue.

The third son of Elias Fries, Johan Otto Fries (1838-1931), was a surveyor and did not contribute to botany.

The fourth son of Elias Fries, Oscar Robert Fries (1840-1908), had nine children of which one son, **Elias Theodor (Thore) Fries** (1875-1951), made his living as a physician but also was active in botany.

3rd generation: Klas Robert Elias Fries (1867-1966), the second son of Theodor M. Fries (1832-1913), had one son, **Carl Magnus Elias Fries** (1917-1987) (a.k.a. Magnus Fries), who was a docent in botany at Uppsala Univ.

Thoralf Gustaf Elias Fries (1882-1963), the seventh child of Theodor M. Fries (1832-1913), had one son, **Nils Thorsten Elias Fries** (1912-1994) (a.k.a. Nils Fries), who was a prof. of fungal physiology at Uppsala Univ.

The following entries will treat members of the Fries family in alphabetic order, using their full given names, thus e.g. Rob. E. Fries will be alphabetized as (Klas) Robert Elias Fries, etc.

***Fries, Elias Magnus** (1794-1878), Swedish botanist (a founder of taxonomic mycology), born 15 Aug 1794 in Femsjö (Småland), the first botanist of a family of renowned Swedish botanists (see the *Fries family* above), attended school at Växjö, went to Lund 1811 and studied under E. Acharius, docent and Ph.D. 1814 Lund (20 years old!), adjunct in botany 1819, royal prof. 1824, prof. agricultural economics, Uppsala 1834, prof. of botany and agricultural economics and head of the Botanical Garden 1851-1859, Commander of the North Star 1856, retired as prof. 1859 and as garden dir. 1863, died 8 Feb 1878 in Uppsala. Note: This is a fourteen part series that Fries alone (Parts I-III) and then in collaboration with his brother R.E. Fries (Parts IV-XIV) edited. All of the parts were published in Notizbl. Bot. Gart. Berlin-Dahlem, vols. 8-11. 1923-1930. Authorship varies (even within a part) and some of the contributions have been treated earlier under the names of collaborators (e.g. Carl Christensen, Part VI, see TL-2/Suppl. 4, nr. 26.238). We have seen offprints only of the first and tenth part, but offer the following summary of the paging and dates for the entire work:

HERBARIUM and TYPES: S. Africa: B; diatoms: BM; other plants: QMC (transferred to NMW), TUB? *Note*: About 1912, Fritsch began to collect illus. of freshwater algae and at

his death he had accumulated ca. 20,000. His widow gave this collection to the Freshwater Biological Association (now in Ambleside, Cumbria, United Kingdom). *The Fritsch Collection of Illustrations of Freshwater Algae* now contains over 500,000 illus. IDC has issued a microfiche edition with supplements (see also TL-2/1: 891, and Taxon 22: 308-309. 1973); basic collection (1964), and Suppl. 1 (1972), 2 (1978), 3 (1982), 4 (1987), 5 (1992) and 6 (1996). A genus index to the basic collection and supplements was compiled by Pertti Eloranta, Prof. of Limnology, Univ. of Helsinki.

Co-author: Rigg, George Burton (1872-1961), see TL-2/4: 791-792 and IH 2: 762.

Publ.: 12 Sep 1912 (see Note (1)), p. [1]-453. *Copies*: Harriman, HH (n.v.), USDA (n.v.).

Note: (1) There is no internal evidence for a date. However, T.C. Frye evidently told H.M.

Hall in 1921 that the flora was published on 12 Sep 1912 (*vide* IPNI sub "Northw. Fl.").

(2) This volume is a precursor to *Elem. fl. Northwest* (see nr. 35.804 below) and derived, in turn, from *Laboratory exercises in elementary botany; based on plants of the Pacific slope* (1909, 1911) by the same authors.

35.803. *The ferns of Washington*[.] Illustrated ... [Port Richmond, New York] 1913-1914. Oct.

Co-author [and principal *illus.*]: Jackson, Mabel McMurry (fl. 1913-1914), a student of T.C. Frye.

Publ.: 1913-1914 (p. [1] signed 20 Mar 1913, cover-t.p. gives dates of serial publications in 4 parts), cover-t.p., p. [1]-59, *pl.* 1-20 (mostly draw., some uncol. phot.). *Copy*: HH. – Reprinted and to be cited from Amer. Fern J. NOTE: The following titles treated earlier can be amended as follows:

(1) *Man. Ind. timb.* ... ed. 2 (1881) (see TL-2/1, nr. 1935), add:

Reprint [Ed. 2]: 1972 ... Dehra Dun (Bishen Sing Mahendra Pal Singh). *Copy*: MO.

(2) *Fl. Madras* ... (see TL-2/1, nr. 1936), add:

Ed. 2 [reprinted]: [1957 & 1967] ... Calcutta (Botanical Survey of India) ... 3 vols. (but type reset so: vol. 1: [i]-lii, [1]-408, 2: [409]-942, 3: [943]-1389, map (fold.)). *Copies*: Nicolson [1967], NY (n.v.).

COMPOSITE WORKS: (1) Pref. in Upendranatha N. Kanjilal (1859-1928), *Forest flora of the school circle, N.-W.P.* ... 1901.

(2) Collaborated with Sir G. King, *Mat. fl. Malay. Penins.* (King) ... 26 parts, 1889-1936 (TL-2/2, nr. 3655, emend.), being co-author of fascicle nos. 14-21 and sole author of nos. 22-25. *Note*: (a) The title is incorrect in TL-2/2, nr. 3655. It should be *Materials for a flora of the Malayan Peninsula* and abbreviated *Mat. fl. Malay. Penins.* (King). Confusion is compounded by the running head of all pages: "Flora of the Malayan Peninsula". (b) The title is the same and easily confused with that of a contemporary work by Henry Nicholas Ridley (1855-1956), abbreviated *Mat. fl. Malay. Penins.* [the 3rd word not an abbreviation!] (Ridley), see TL-2/4, nr. 9208. (c) *Flora of the Malayan Peninsula* ... Delhi (Cosmo) ... 1986 ... is a confusingly titled reprint of only nos. 16-17 of King & Gamble's work (the final part of the Rubiaceae to the Pedalinaceae). *Copy*: MO.

Note: TL-2/1: 908 (sub "Composite Works") suggested that Gamble co-authored the treatment of the Bambuseae in J.D. Hooker, *Fl. Brit. India*, vol. 7: 375-420 [late Apr-early Dec] 1896. In fact, Hooker, who wrote the Gramineae for the flora, stated (p. 375) that the treatment of the bamboos was "drawn up, almost verbatim, from Mr. Gamble's 'Bambuseae of British India,' ..." and that he [Hooker] had a copy in advance of its publication in the journal. Hooker could well have gotten a copy of the text after 16 Oct 1894 (without t.p. or indices). The printer's dates indicate the main text was printed first (p. [1]-128. 16 Oct 1894), the introd. was printed 8 Aug 1895 and, finally, the indices were printed 7 Mar 1896.

***Gandoger**, [Jean] **Michel** [Michael, Michaële, Michaeli, Michale] (Abbé) (1850-1926), French botanist, born 10 Mai 1850 in Arnas (Rhône), began collecting plants at age 15, joined the Société Botanique de France at age 21, became a priest at age 26, began his *Flora Europae* (which eventually included more than 100,000 formae) at age 32, amassed an enormous herb. through collecting and purchase, ceased traveling in 1921 after becoming ill, died 4 Oct 1926 in Lyon. (*Gand.*)

HERBARIUM and TYPES: LY (80,000, orig.), duplicates in many herbaria (see IH 2: 216, and add PAL, USPIY). N.B.: The citations of localities on labels of duplicates distributed by Gandoger are not always trustworthy. He issued various sets of exsiccatae, e.g. *Flora algeriensis exsiccata*, *Flora gallia exsiccata*, *Plantae maroccanae*, *Flora hispanica exsic-*

***Gaudichaud-Beaupré, Charles** (1789-1854), French pharmacist, naturalist and circumnavigator, born 4 Sep 1789 in Angoulême (now Dépt. Charente), studied under A.-L. de Jussieu and L.-C. M. Richard, entered corps of "pharmacien de la Marine" 1810 and eventually became "pharmacien en chef de la Marine", stationed at Anvers 1811-1814, sailed three times around the world: on (1) the *Uranie* (wrecked and replaced by), the *Physicienne* (1817-1820), (2) the *Herminie* (1831-1833) and on (3) the *Bonite* (1836-1837), "aide-naturaliste", Muséum natl. d'Histoire naturelle, Paris 1845-1846, Académie de Médecine 1825, Légion d'Honneur 1826, Académie des Sciences 1837, died 16 Jan 1854 in Paris. (*Gaud.*).

HERBARIUM and TYPES: [mostly repeated from TL-2/1: 921] Gaudichaud gave all his collections to P [and PC]. The collections made on the voyage of the *Uranie* and the *Physicienne* (1817-1820) went directly to P. Part of the collections were lost during the voyage when the *Uranie* stranded in the Falkland Islands (Îles Malouines). Gaudichaud's mss. journal of the voyage is at P. The collections made in Brazil from 1831-1833, as part of the voyage of the *Herminie*, were given by him to the Muséum natl. d'Histoire naturelle, Paris (i.e. P) on 2 Nov 1833 (5000 specimens); those made on the voyage of the *Bonite* (1836-1837), numbering 3500 specimens, were received by P in 1837. All cryptogams are at PC. The plants figured in the atlas of the voyage of the *Bonite*, however, form a special case. I.M. Johnston (1944) pointed out that not all plates are based on specimens collected during that voyage. Some of the plates must have been made from specimens collected by

Gaudichaud on other voyages, or from specimens found by him in other herbaria. Some of these specimens may be in the Webb herb. (FI). Duplicates can be found in A, B, BM, DS, FH, G, G-DC, K, L, M, MO, MPU (in Herb. Cambessèdes), PH (Lich., few), US, W.

NOTE: The two principal taxonomic works of Gaudichaud are now available in microfiche:

(1) *Voy. Uranie ... 1826-[1830]* (see TL-2/1, nr. 1968):

Microfiche: [Zug, Switzerland], (IDC), [198-?], 29 microfiches, 9×13 cm [Fiche numbered in two parts (12 text & 17 atlas)]. *Copies*: MO (n.v.), US.

(2) *Voy. Bonite, Bot. ... [1841]-1846-1866* (TL-2/1, nr. 1969):

Microfiche: Zug, Switzerland, (IDC), [198-?], 37 microfiches, 9×12 cm. *Copy*: US.

The following was extracted from "Livre II of his [i.e. Gaudichaud's] Botanique, the fourth volume of *Le Voyage autour du monde ...*" (see TL-2/1, nr. 1968):

(3) St. John, H. & M. Titcomb (d. 28 Aug 1982), *The vegetation of the Sandwich Islands [Hawaii] as seen by Charles Gaudichaud in 1819; a translation, with notes, of Gaudichaud's "Îles Sandwich"*. Occas. Pap. Bernice P. Bishop Mus. 25(9): [1]-16. 1983. *Copies*: BM (n.v.), HH (n.v.), MO, NY (n.v.), US.

36.158. *Rapport sur la flore des îles Malouines* de M. Gaudichaud ... Extrait des Annales des Sciences Naturelles ... Paris ... 1825. Oct [or smaller].

Author: Mirbel, Charles François Brisseau de (1776-1854), see TL-2/3: 520-522 and IH 2: 543.

Publ.: 1825 (read 16 Mai 1825), p. 1-20, pl. 2-3 (uncol. copper engr.). *Copies*: K, WU. – Reprinted and to be cited from Ann. Sci. Nat. (Paris) 5: 89-110, pl. 2-3. 1825.

Note: (1) Mirbel's paper is a review of mss. and specimens (?) sent by Gaudichaud. (2) In presenting the review to the Académie Royale de Médecine [i.e. publishers of the journal!], it is "Signé, Desfontaines, Mirbel, rapporteur". (3) The novelties proposed in the "... tableau de la végétation des Malouines" are to be attributed to Gaudichaud alone.

36.159. *Secondes notes relatives à la protestation faite à la Académie des Sciences, dans sa séance du 12 juin 1843, à la suite de la lecture du mémoire de M. de Mirbel, ayant pour titre: Recherches anatomiques et physiologiques sur quelques végétaux monocotylés ...* Paris ... 1843. Oct.

Subject: Mirbel, Charles François Brisseau de (1776-1854), see TL-2/3: 520-522 and IH 2: 543.

Publ.: Oct 1843 (on t.p.), p. [1]-20. *Copy*: L. – Reprinted and to be cited from Ann. Sci. Nat., Bot., sér. 2, 20: 199-218. 1843.

Note: This is the second of four notes (in five fascicles) by Gaudichaud and concerning Mirbel's memoir. The others, for which we have not seen reprints, are: "Premières notes relatives à la protestation faite dans la séance du 12 juin 1845 [sic], à la suite de la lecture du mémoire de M. de Mirbel Mirbel ...", Id., sér. 2, 20: 32-45. Jul 1843; "Troisième notes ...", Id., sér. 3, 1: 263-291. Mai 1844 (read 8 Apr 1844); and "Quatrième notes ...", Id., sér. 3, 2: 33-45. Jul 1844 (read 20 Mai 1844), 124-140. Aug 1844 (read 20 Mai 1844).

Gaudin, Charles Théophile (1822-1866), Swiss paleobotanist, born 4 Aug 1822 in Lausanne, studied theology in Lausanne but not consecrated, private tutor ("précepteur") in England for the family of Lord Ashley (1801-1885) (later 7th Earl of Shaftesbury) 1845, returned to Switzerland and began paleobotany studies 1851, private tutor for Gabriel de Rumine (1841-1871), the son of a Russian emigré family that settled in Lausanne and which also financed Gaudin's paleontological research, founded with Mme. Catherine de Rumine (1818-1867) the Musée Industriel, Lausanne 1862, died 7 Jan 1866 in Lausanne. (*C.T. Gaudin*).

The Gautier herb. at DS (126,000 sheets) contains the types of Gautier's new taxa published in his two floras, as well as the types of J.V. Martrin-Donos' *Florule du Tarn*. The *Hieracium* collection of Gautier was not included in the herb. as it came to DS. – *Exsiccatae*: Gautier, together with Casimir Arvet-Touvet, issued an *Hieraciotheca*.

***Gilbert, Jean Emmanuel** (1741-1814), French botanist, physician and politician, born 21 Jun 1741 in Saint-Clair (Lyon), studied medicine in Montpellier 1760-1763, at Chazay-d'Azergues 1766-1768, through the intercession of A. von Haller and A. Gouan went to Lithuania (Grodno and Vilnius) 1775-1783, where at the behest of Stanislas II (King of Poland) he was to modernize teaching of natural history and medicine, returned to Lyon 1783 and practiced medicine, played an active role in the French Revolution, elected "Girondist" mayor of Lyon 1793, briefly imprisoned, returned to teaching 1796-1803, died 2 Sep 1814 in Lyon. (*Gilib.*).

HERBARIUM and TYPES: LY?, KRAM, KW; France (Lyon, leg. 1802): P-JU. It is questionable whether the Gilbert collections at Kiev (KW) are complete and they may have been transferred to Krakow (KRAM). Magnin stated that Gilbert's herbaria were given, at least in part, to Alexis Jordan (1814-1897). If so, these specimens are to be sought in LY.

NOTE: (1) Four of Gilbert's works (TL-2/1, nrs. 2012-2015) are listed in the Appendix V *Opera Utique Oppressa* of the 2006 Vienna *Code*. Names appearing in these works in the ranks specified at the end of each listing (species and infraspecific taxa, in Gilbert's case)

are not to be accepted as validly published. This list was established by action of the Tokyo Congr. (1993) and first appeared in the 1994 Tokyo Code.

(2) Christine Barker (Kew) pointed out several typographical errors associated with TL-2/1, nrs. 2013 and 2015, involving the Latin word *Exercitium* (exercise), its plural *Exercitia*, and its abbreviation, *Exerc.* In nr. 2013, the abbreviation “*Excerc.*” should be “*Exerc.*” In nr. 2015, the first title word “*Excercitia*” should be corrected to “*Exercitia*” and the abbreviation “*Excerc.*” should be corrected to “*Exerc.*”

(3) A number of titles reprinted in *Syst. pl. Eur.* ... 1785-1787, 7 vols. (TL-2/1, nr. 2014) have subsequently been analyzed in more detail in the later volumes of TL-2. These include:

(a) M. Alphonin, *Usum hist. nat.* ... 1766 (TL-2/Suppl. 1, nr. 19.316), “Reprinted in ... ed. J.E. Gilibert, *Syst. pl. Eur.* 5: i-xix. 1786”.

(b) J.A. Murray, *Vindic. nom. triv.* ... 1782 (TL-2/3, nr. 6574), “Reprinted: ... in Gilibert, *Syst. pl. Europ.* 5: xlvi-lxxv. 1786”.

(c) M.A.L.C. de Latourrette, *Chlor. lugd.* ... 1785 (TL-2/2, nr. 4231), “Reprinted in J.E. Gilibert, *Syst. pl. Eur.* vol. 1, 1786 (no. 2014), (with a supplement; orig. text consists of orig. sheets)”.

(d) D. Villars, *Flora delphinalis* ... 1786 (see TL-2/6: 740), “in J.E. Gilibert, C. Linnaei ... *Systema plantarum europae* 1, 1785 (publ. Jun 1786), vii, 127 p. (Latin transl. of *Prospectus*)”.

(4) Several of Gilibert’s works are now available in microform:

36.431. *Le calendrier de flore*, pour l'année 1778, autour de Grodno, et pour l'année 1808, autour de Lyon ... Lyon (Chez Amable Leroy) 1809. Qu.

Co-author [in part]: Lortet, Mme. Clémence (née Richard) (1772-1835), see TL-2/3: 164. *Publ.*: 1809, h.t., p. [i], t.p., [i]-viii, [1]-88, 1 map (unnumb., uncol., fold., Lyon & vicinity). *Copy*: BM.

Note: (1) Earlier Stafleu & Cowan (TL-2/3: 164) wrote "Clémence Lortet contributed to publications by [J.-B.] Balbis and Gilbert; published – through Gilbert – a *Calendrier de Flore* (1809)" Their statement is mostly correct; she contributed to the Lyon portion, at least, of this calendar, which is confirmed on p. vi where Gilbert mentions the zealous way in which Mme. Lortès (sic) botanized regularly around Lyon and how they pooled their data on flowering times. (2) Lyon data are presented on p. 1-48, 61-62 (as a suppl.) and 63-88 (index); Grodno data (gathered by Gilbert alone) on p. 49-60.

***Gleason, Henry Allan** (1882-1975), American botanist, pioneer ecologist and plant geographer, born 2 Jan 1882 in Dalton City, Illinois, published his first paper at age 13, B.Sc.

1901 and M.A. 1904 Univ. of Illinois (and teaching there 1906-1910), Ph.D. 1906 Columbia Univ., New York, New York (under N.L. Britton), taught at Univ. of Michigan 1910-1919, traveled to Philippines, Java and Ceylon 1913-1914, held various research and administrative positions at New York Botanical Garden from 1919 until his retirement Dec 1950, first president (and one of the organizers) of A.S.P.T. 1937, president B.S.A. 1948, specialist on Melastomataceae, died 21 Apr 1975 at the home of his son in Toronto, Canada. (*Gleason*).

NOTE: Gleason's son, Henry Allan, Jr. (1917-2007), was a linguist but also privately published a booklet entitled *Mosses and moss collecting ...* [Hartford, Conn.] 34 p. 1950. *Copy*: NY (n.v.).

HERBARIUM and TYPES: mostly at NY (see IH 2: 227, for details). – Extensive mss. materials at NY (Henry Allan Gleason papers), which include a card file with notes (protologues, sketches, measurements, phot.) on neotropical Melastomataceae. The card file was extensively annotated by John J. Wurdack (1921-1998) while on extended loan to US (now returned to NY).

***Gleditsch, Johann Gottlieb** (1714-1786), German botanist and silviculturist, born 5 Feb 1714 in Leipzig, doctorate 1730 Leipzig, curator in Leipzig 1731-1735, Dr. med. 1742 Univ. Frankfurt/Oder, first Dir. (Praefectus) Berlin Botanical Garden 1744-1786 and other posts in forestry, died 5 Oct 1786 in Berlin. (*Gled.*)

HERBARIUM and TYPES: The Gleditsch herb., acquired by the Berlin Academy of Sciences in 1791, is lost. The *Berichte über die ... Verhandlungen der Königl. Preuss. Akademie der Wissenschaften zu Berlin* for the year 1840 contains a statement on p. 81 that H. Goepfert showed a 'Verzeichnis' of the former Gleditsch herb., and a further note on p. 119 in which Link presented this register "mit der Bemerkung das dieses Herbarium nicht mehr vorhan-

den sei". Urban could not trace the collection either. Gleditsch was a corr. of Linnaeus and there are plants collected by him in LINN.

Gmelin family. The genealogy of this family that contributed greatly to Botany is analyzed in [Moriz Gmelin], *Stammbaum der Familie Gmelin 1877* (n.v.). The "botanical" Gmelins

essentially begin with **Johann Georg Gmelin** (1674-1728) who defended a botanical thesis under Rudolf Jakob Camerarius in 1699, married in 1706, and had three "key" children and three "key" grandchildren:

1. **Johann Konrad Gmelin** (1707-1759) who had 15 children, incl.:
 - ***Samuel Gottlieb Gmelin** (1745-1774) (TL-2/1: 958) who traveled in s. Russia with P.S. Pallas and died in Persia; and **Christian Gottlieb Gmelin** (1749-1809) who had a connection with Goethe.
2. ***Johann Georg Gmelin** (1709-1755) (TL-2/1: 956-957) who traveled in Siberia, became Prof. of Bot. and Chemistry in Tübingen, and published *Fl. siber. ... 1747-1769*, 4 vols. (TL-2/1, nr. 2047), the last 2 vols. of which were edited by his nephew, *Samuel Gottlieb Gmelin (see above).
3. ***Philipp Friedrich Gmelin** (1721-1768) (TL-2/1: 957-958), also of Tübingen who had the following sons: ***Johann Friedrich Gmelin** (1748-1804), (TL-2/1: 955-956), Prof. at Tübingen, then at Göttingen, editor of the 13th (i.e. the last) ed. of *Syst. nat. ... 1788-1793* (TL-2/1, nr. 2043); and ***Carl Christian Gmelin** (1762-1837) (TL-2/1: 954-955), author of *Fl. bad. ... 1805-1826*, 4 vols. (TL-2/1, nr. 2040).

***Gmelin, Carl** [Karl] **Christian** (1762-1837), German physician and naturalist, born 18 Mar 1762 in Badenweiler nr. Freiburg, studied, Univ. of Strassburg, Dr. of medicine 1784 Friedrich-Alexander-Univ., Erlangen, prof. of natural sciences and dir. from 1786 of the botanical garden at Karlsruhe, died 26 Jun 1837 in Karlsruhe (Baden-Württemberg). ***Godefroy-Lebeuf, Alexandre** (né **Godefroy**) (1852-1903), French horticulturist and importer of exotic plants, gardener, Service de la Culture, Museum natl. d'Histoire Naturelle, Paris 1869, then worked for L. Linden in Belgium and studied at Kew 1871-1872, head gardener, botanical garden, Saigon, French Indochina 1874, married Mlle. Lebeuf (daughter of the horticulturist V.F. Lebeuf) 1876, his horticultural firm the Maison A. Godefroy-Lebeuf of Montmartre (Paris) became the principal importer to France of plants and exotic orchids from its colonies, traveled in Cambodia and Laos 1876-1878 with Frère François-Jules Harmand (1845-1921), died 2 Aug 1903 in Paris. (*God.-Leb.*).

NOTE: The spelling of his surname is corrected from TL-2/1 where it was given as "Godefroy-Leboeuf". He married (1876) Mlle. Lebeuf (*not* Leboeuf) and became son-in-law and successor to V.F. Lebeuf, who was the proprietor of an horticultural firm in Argenteuil, France; presumably the hyphenated name commercially advantageous.

***Goethe, Johann Wolfgang** (von) (1749-1832), famous German author, poet and "Natur-Philosoph". (*Goethe*).

This entry is introduced only to:

(1) Take the advice Rudolf Schmid gave F.A. Stafleu (in litt., 1 Feb 1977) clarifying that Agnes Arber, *Goethe's Botany* (*Chron. Bot.* 10(2): 67-124. 1946) includes the perhaps

most widely read English transl. of Goethe's 1790 *Versuch, die Metamorphose der Pflanzen zu erklären* (p. 89-115) (see TL-2/1, nr. 2081).

(2) Note Walter H. Hodge's paper (Principes 26: 194-199. 1982) on "Goethe's palm", stating that the palm clump of *Chamaerops humilis* L. that Goethe studied in 1787 in Padua is still living; Hodge's point was that this particular palm specimen was 200 years old when Goethe visited it, having been planted in 1585!

(3) Call the reader's attention to several more recent publications concerning Goethe and botany:

Gómez de la Maza [y Jiménez], **Manuel** (1867-1916), Cuban botanist and physician, born 10 Mai 1867 in Havana, Doctorate in Medicine and Natural Sciences 1887 Univ. of Havana, prof. of botany and phytogeography, Univ. of Havana, died 26 Jan 1916 in Havana, "... era un botánico de gabinete" who on his death left numerous unpublished mss. (*M. Gómez*).

NOTE: Colleagues who know Hispanic personal nomenclature postulate [not confirmed] that (1) his paternal family name was Gómez, (2) his paternal grandmother's family name was de la Maza, presumably an important family name and (3) his maternal family name was Jiménez. Nonetheless, he signed his publications as "Manuel Gómez de la Maza".

HERBARIUM and TYPES: not cited in IH 2, presumably at one of the herbaria in Havana.

(4) *Wild fl. Amer.* ... [1876-]1880-1882[-1894] (TL-2/5, nr. 12.635) was treated earlier under its illustrator, Isaac Sprague. Issued in parts, the publication is more complicated than the earlier entry suggests. There is an 1876-1880, Salem [Mass.] (S.E. Cassino)/New York (Dodd Mead & Co.) imprint and an 1879-1880 [© 1879] subscription edition ("Sold only to subscribers for the whole work") with a Boston (S.E. Cassino) imprint. In addition, two imprints, both Boston (Bradlee Whidden), are the most commonly encountered ones; the first was issued in 1886 [© 1879] and the second 1894 [© 1879]. The BKL copy of the 1894 imprint is dated by pen "February 13th 1894".

***Gottsche, Carl [Karl] Moritz** (1808-1892), Danish-born German physician and hepatologist (noted for superb drawings), born 3 Jul 1808 in Altona (then part of Denmark), graduated in Berlin and Copenhagen as doctor of medicine and surgery in 1831, settled in Altona 1834 to care for his father and practice medicine, after his father's death in 1837 he devoted his life to botany and often traveled (e.g. E. Asia 1885), died 28 Sep 1892 [of typhus?] in Altona (then part of Prussia). (*Gottsche*).

NOTE: Not to be confused with the geologist Carl Christian Gottsche (1855-1909).

HERBARIUM and TYPES: Gottsche's original herb., mss. and drawings were at B. "... wohl haben Asa Gray und Hooker versucht, es uns Deutschen zu entführen; dem patriotischen Manne war es ein Herzensbedürfniss, dass es in Deutschland blieb, und so verbindet sich mit dem Schmerz über seinem Heimgang, die Freude, dass uns dieser Schatz ... erhalten geblieben ist" (*vide* Stephani). BM has "many authentic specimens of hepatics described by him, acquired with Herb. Hampe in 1881", MANCH has Bryoph., and other specimens are at GH and GJO. Also of note are the *Icones jubularum*, tracings of drawings and hepatics by Gottsche and others, now at FH (see TL-2/6: 706). – *Exsiccatae*: (1) Co-author of fascs. 6-11 of J.B.W. Lindenberg, *Sp. Hepat. (Lindenberg)* ... Bonn ([1839-]1846-1851) (see TL-2/3, nr. 4632). (2) Co-author of decades 23-66 of G.L. Rabenhorst, *Hepat. Eur., Leberm.* ... Dresden ([1855-]1869-1879 (see TL-2/4: 463 sub "Exsiccatae: (9)")).

EPONYMY (additional): Asa Gray Award, A.S.P.T.

NOTE: (1) I [DHN] found a fascinating review of then current botanical events by Asa Gray in Amer. J. Sci. Arts, ser. 2, 13(37): 42-53. Jan 1852 [reprint repaged, p. 1-13]. It touches on Alph. de Candolle, posthumous publications of Kunth and Endlicher, Brongniart, Martius, deaths of Link, Kunth, Koch, Ledebour, Bernhardt, Wahlenberg, what Webb and Weddell are doing, Montagne, Decaisne, Gaudichaud, Spach, Naudin, Claude Gay, purchase of Pavon herbarium, Richard, Boissier, Choisy, Lehmann, Blume, Wm. Hooker (noting the new Palm House), J.D. Hooker, acidulous comments on Griffith's posthumous publica-

tions, work in fossils, ferns, hepatics, mosses, algae, lichens. It shows an astounding grasp of what was going on in European botany!

(2) Earlier a skeletal revision of *Contributions to North American botany* ... 1846-1888 (see TL-2/1, nr. 2123) was offered; the serial but not reprints analyzed. Subsequently we have examined a number of reprints and our analyses are detailed below (each reprint analyzed also is assigned a new number in the TL-2 series).

(3) Information on IDC microfiches not in TL-2/1:

Nr. 2123 *Contr. N. Amer. Bot.* is on IDC E-5937/2;

Nr. 2124 *Manual* (Gray) is on IDC E-7546 (Ed. 1 of 1848);

Nr. 2125 *Gen. Amer. Bor.* is on IDC E-5130;

Nr. 2127 *Pl. wright.* is on IDC E-7547/1; and

Nr. 2132 *Syn. Fl. N. Amer.* is on IDC E7548/1.

***Greene, Edward Lee** (later Rev.) (1843-1915), American botanist and clergyman, born 20 Aug 1843 in Hopkinton, Rhode Island, at age 12 moved with his family to Wisconsin, infantryman in Union Army during Civil War 1862-1865, Ph.B. 1866 Albion Acad., Wisconsin 1866, taught in rural schools in Illinois until 1870, taught botany and studied theology in Colorado 1871, ordained Episcopal minister 1873, collected plants in the American West for 12 years, converted to Catholicism 1885, first Prof. of Botany, Univ. of Calif., Berkeley

1885-1895, LL.D. 1895, Univ. of Notre Dame, Indiana, at Catholic Univ. of America, Washington, D.C. 1895-1904, hon. assoc. in Botany, Smithsonian Inst. 1904-1915, died 10 Nov 1915 in Washington, D.C. (buried in Notre Dame). (*Greene*).

NOTE: A preliminary study by T.J. Crovello in 1971 (mentioned on a typed card at US) indicates E.L. Greene published 4412 new taxa.

HERBARIUM and TYPES: ND-G (shipped Feb 1915 to Notre Dame from Washington, D.C.). For duplicates see IH 2: 238 (and add BHUPM). Greene stipulated in his will that specimens should never leave his herbarium (*vide* Thomas, 1961). Greene's library is also at ND. – Important mss. collections include Edward Lee Greene papers, Univ. of Notre Dame Archives and Thure L. Kumlén papers, Wisconsin Historical Society, Madison. In addition, materials concerning Greene and collected by Robert P. McIntosh are in the Univ. of Notre Dame Archives and the Dept. of Botany, Univ. of Calif., Berkeley.

NOTE: As was noted by W.J. Hooker (*London J. Bot.* 7: 446-449, 1848), after Griffith's death in 1845 at age 35 his unpublished mss. were published by John M'Clelland (1805-1883, see TL-2/3: 214). Most of these posthumous papers (often criticized) were treated earlier (see TL-2/1, nrs. 2166-2170). In recent years, however, some of them have been reprinted and/or issued in microform, viz.:

- (1) [Posthumous papers bequeathed to the Honourable The East India Company...] *J. trav.* ... 1847-1848, see TL-2/1, nr. 2166 (*J. trav.*=vol. 1) and 2168 (*Itin. pl. Note: (1) In the journal, a footnote on p. 465 states that this paper was written in 1836 and read before the "Linnæan Society in March, 1838". (2) The microfiche (cited above) has the plate captions, but not the plates.

Note: The following are among the dozen or so papers that came out after Griffith's death in early 1845, the last appearing in 1859!

37.197. Some account of the botanical collection brought from the eastward by Dr. Cantor ... [Calcutta] ... s.d. [1844-1845]. Qu. (*Account bot. coll. Cantor*).

Collector: Cantor, Theodore Edward (M.D.) (1809-1854), see IH 2: 115 (d. "1860").

Publ. [Qu. ed.]: late 1844-early 1845 [sometimes miscited as 1837], p. 33-65, *pl. 1-4* (uncol. lith.). *Copies*: BR (n.v.), HH(2) (without pl., 1 copy imperfect), K. – Preprinted and evidently intended to be included in Calcutta J. Nat. Hist. 21, which was never published (see note).

Note (1): Thanks to investigations by Rosemary Davies (K) and Gea Zijlstra (U) it is apparent that this quarto edition was preprinted, with the intention of the article eventually appearing in vol. 21 of the Calcutta J. Nat. Hist. These preprints are independent of the 1854 edition, which was published (in octavo) by J. Asiat. Soc. Bengal (see below).

(2) Lending further support to the idea that the quarto is an independent preprint is a statement in the octavo edition of the paper, viz. “The following paper has been printed for several years and was intended to form part of an interesting communication by Dr. Cantor on the Natural History of Chusan which was to lead off Vol. XXI of the Asiatic Researches. This publication having been, for the present at all events, discontinued, Dr. Griffith’s valuable memoir on Chusan Botany has been reprinted and now is published with the four plates which accompanied it. – Ed.” (J. Asiat. Soc. Bengal 23: 623. 1854). (3) Cantor’s earlier communication was “General features of Chusan with remarks on the flora and fauna of that Island” (Ann. Mag. Nat. Hist. 9(58): 265-278, (59): 361-370, (60): 481-493. 1842), in which he acknowledges Griffith for plant identifications.

[Oct. ed.]: 1854 [sometimes miscited as 1837], p. 623-650, *pl. 1-4* (uncol. double lith.). *Copies*: no reprint seen. – Issued and to be cited from J. Asiat. Soc. Bengal 23: 623-650, *pl. 1-4*. 1854.

37.198. On *Azolla* and *Salvinia* ... Calcutta ... 1846. Oct.

Publ.: 1846, p. [1]-47, *pl. 15-20* (double pl.). *Copies*: FH (n.v.), K, NY (n.v.), WU. – Reprinted and to be cited from Calcutta J. Nat. Hist. 5: 227-273, *pl. 15-20*. 1846.

37.199. On the *Indian species* of *Balanophora*, and on a new genus of the family *Balanophoreæ* ... Trans. Linn. Soc. Lond. (Bot.) ... 1844 [i.e. 1846]. Qu.

Publ.: 29 Aug 1846 (*fide* Raphael, Biol. J. Linn. Soc. 2(1): 68. ***Gronovius, Johan** [Jan] **Frederik** (1690-1762). (*Gronov.*). – *Note*: Earlier (TL-2/1: 1012) it was stated that Gronovius was baptized in Leiden on 10 Feb 1686 and that the birth year, 1690, often given, is erroneous. In those days, the date of birth was not considered as important as the date of baptism, many babies not surviving to baptism. Often the birth date was not recorded but the date of baptism usually was. Possibly Gronovius was born in 1686 and was baptized in 1690. However, it could just as well be that he was born before 1686 and was baptized 10 Feb 1686. Only study of the original documents can establish the facts. [DHN]

NOTE: The earlier entry for *Österr. Diatom. ...* (TL-2/1, nr. 2201) analyzed the serial publication and a facsimile of the same. Having since examined a reprint of the "Zweite Folge", the entry can be amended as follows:

Die *österreichischen Diatomaceen* nebst Anschluss einiger *neuen Arten* von andern Lokalitäten und einer kritischen Uebersicht der bisher bekannten Gattungen und Arten ... (Aus den Verhandlungen ... Wien) 1862. Oct. (*Österr. Diatom.*).

Publ. ["Erste Folge"]: 1862 (read 5 Mar 1862), ... p. [1]-158, [alternate pagination, p. [315]-472], *pl. III(6)-VII(10), XIII(11)*. *Copies*: BM, FH (detached), NY (detached), WU. – Extracted from Verh. K.K. Zool.-Bot. Ges. Wien 12: 315-472, *pl. 6-11*. 1862.

["Zweite Folge"]: 1862 (read 7 Mai 1862), ... p. [1]-44, [alternate pagination, p. [545]-588], *pl. XVIII(XII)*. *Copies*: BKL, BM, FH (detached), NY (detached), WU. – Id. 12, Abt. 2: 545-588, *pl. XII* (uncol. lith.).

Note: (1) In both the reprint and the journal the plates are numbered twice; Roman numerals (in sequence for the volume) and Arabic ones (for Grunow's article alone) in the "Erste Folge" and different Roman ones in the "Zweite Folge". (2) Plate VIII is misnumbered as "XIII".

Note: There is controversy about the publication date (none on the t.p.), e.g. Blake & Atwood state "[1911?]" and the BM library cat. has it as "[1911]". The t.p. copied at NSW has a handwritten note at the bottom: "Published in 1909 according to information received from the Public Library Sydney". This note is initialed, possibly reading "N.W." [but apparently involving three letters since there are three periods] and dated "10/4/41" [i.e. 10 Apr 1941].

***Guillemin**, [Jean Baptiste] **Antoine** (1796-1842), French botanist and traveler, born 20 Jan 1796 in Pouilly-sur-Saône (Côtes-d'Or), apprenticed to a pharmacy in Dijon 1812, moved to Geneva 1814 where he studied under Jean Pierre Vaucher and then A.P. de Candolle, moved to Paris 1820 where eventually he succeeded Achille Richard as curator of Benjamin Delessert's herb. and library 1827-1842, simultaneously “aide-préparateur” 1827 and “aide naturaliste”

to the botany chair (succeeding Adolphe T. Brongniart) 1834, Muséum natl. d'Histoire naturelle, Paris, Dr. en médecine 1832 Paris, sent on a government sponsored mission to Brazil 1838-1839, died 13 [15?] Jan 1842 shortly after moving to Montpellier. (*Guillemin.*)

NOTE: Guillemin and Joseph-Henri Leveillé (1796-1870) jointly are credited with coining the term "baside" (i.e. basidium) for the spore-bearing structure in Basidiomycetes.

HERBARIUM and TYPES: The first set of Guillemin's own Brazilian collections is at MJSD (not DI, as stated in TL-2/1) with the rest of his herb. His types are mainly at P, but also in G (G-DC and Delessert Herb.); some duplicate material also is found in DBN, DS, E-GL and K. – Corr. with A.P. de Candolle in G (Archives).

Note: (1) This was projected to include 28 fascicles (=Séries) with 900 pages of text and 280 plates, but as of 1912 only 9 fascicles were published and distributed (320 pages, 93 plates of which 45 were in color). (2) There is indirect evidence that additional fascicles were issued in 1913 but we have not seen them. A notice of this same title by Guinier appeared in *Bot. Centralbl.* 124(14): 219. 14 Oct 1913. It states "Paris, 1913. 8°. Fasc. 2 et 3. 20 pl. (10 col) avec 20 pp. texte", these details not agreeing with Série 2 and 3 in the 1912 edition.

Index to Titles

Each book or paper treated in the foregoing text has been assigned a number printed in bold face type; these numbers are given in this index at the end of each entry. Because both short titles (the first significant words of the full title) and abbreviations of short titles are given, this index includes both. The initial definite and indefinite articles are omitted from titles. The unabbreviated short titles are alphabetized word for word, but abbreviated ones are treated as if they were single words with the omission of punctuation and spaces.

If a title is mentioned under two numbers, both are given in this index. Since the same title, at least in its short form, may have been used by two or more authors, such entries include the name of the author in the form recommended at the end of the first paragraph of the section treating him or her.

Titles of *exsiccatae* are included, printed in italic type, and titles of journals taken from the surname of botanists are printed in capital letters. Both kinds of entry include, in parentheses, the word *see* in italic type followed by the surname concerned and then the initials of the author's first name.

In addition, there are three less frequently encountered kinds of references that should be identified and explained:

(1) When a second title of the same author is mentioned in the treatment of a book or paper, the index entry for the former refers to the number of the latter.

(2) It sometimes happens that in the treatment of one book or paper by author A, the title of a book or paper by author B is mentioned; this situation is indicated in the index by parenthetically instructing the reader to see the number assigned to author A's title.

(3) Similarly, a book or paper by author B may be mentioned under author A in paragraphs other than those describing his or her titles; this is indicated by the index-notation "see author A".

Index to Names

This index contains the names of authors, collectors, botanical explorers, patrons of botanists, botanical artists and other collaborators, as well as personal surnames that have been immortalized in names of genera. The names of ships that carried exploring expeditions to remote parts of the world are included in the index too, because the user may only remember that much of the subsequent reports of the trip.

There are, however, a number of explanations and caveats:

(1) The abbreviations of author names are included in the index when they are really abbreviations, i.e. some letters or at least the initials of the first name(s) have been dropped. Such abbreviations are in *italics* and alphabetized as if they were complete words, with the omission of punctuation. In this index the initials follow the abbreviations even though the abbreviation in the text is preceded by initials.

(2) Diacritical marks are retained (which was not done, except for the German umlaut, in previous indices).

(3) Names beginning with “Mc”, or “Mac” are treated as if spelled “Mac” in combination with the rest of the name as one word (e.g. McDougall).

(4) Similarly, double names, whether hyphenated or not, names beginning with “Da”, “De”, “Des”, “Do”, “Eu”, “La”, “Le”, etc. are alphabetized as if they were one word under the first letter of the word (“Candolle” for “de Candolle” is one of the few exceptions where established usage does not conform to this convention). The same holds for Flemish and American names that begin with “Van”. If there is a chance of confusion in locating such a name, the index lists also the last part of the name under the appropriate letter. Hyphenated double names are not, however, cross-referenced under the last part.

(5) Names of authors of publications cited in the biography/bibliography sections are omitted from this index.

(6) “Beccari, O. 20.510-20.552 (italic number(s)) refers to that part of the text just preceding the treatment of the title numbers 20.510-20.552. “Beccari, O. 21.661” (roman number) means that there is a reference to O. Beccari in the information concerning title 21.661, which is by an author other than O. Beccari. “Hooker, J.D. *see* Beccari, O.” indicates that J.D. Hooker is mentioned in the author paragraphs under O. Beccari.

(7) An author’s name with the notation “(*alph.*)” indicates a person who is included in the text for some reason but who did not publish items treated in this supplement (e.g. “Bourgeau, E. (*alph.*)”).

(8) The notation *v.* is used to connect the abbreviation of a personal name with the name in full to explain the meaning of the abbreviation. It is also used as a means of cross-referencing double names, maiden names of married botanists who have published under both names, and names of authors who have used more than one name for their publications. Finally, when a name is frequently used with initial(s) differing from the correct one(s), or in case of different spellings of a name, *v.* is used to connect the various versions of the name.
